Eyelash Extensions with LCN *Amazing Lashes*

What is so special about eyelash extensions?

Beautiful, thick eyelashes are the ideal frame for the eyes, creating a masterpiece of expression, sensuousness and enchantment with a single look. It's no wonder that eyelash extensions are so popular.

How long do Amazing Lashes last?

The durability is equivalent to a natural eyelash, as the eyelashes are attached to the natural eyelashes. A natural eyelash falls out after approx. 60 – 90 days and is replaced by a new eyelash hair. A refill should therefore normally be carried out every 2-4 weeks.

Do Amazing Lashes affect the eyes in any way?

LCN eyelashes are manufactured from synthetic fibres that are placed exactly onto the natural eyelashes and do not cause any irritations. They are not fixed directly on to the eyelid, but to the individual natural eyelash hairs with the help of the LCN Special Adhesive and are completely harmless. The application is absolutely painless and in no way damages either the eyelids or the eyelashes.
